December, 2010

COCOABSORB LANDFILL TEST RESULTS

CocoAbsorb meets and exceeds federal EPA leachate standards for hydrocarbon/petroleum products.

Testing was conducted November 2010 at Exova Laboratories in Sante Fe Springs, CA at 9240 Sante Fe Springs Rd. Sante Fe Springs 90670

Test #1 is the TCLP. It is the RCRA Metals in TCLP leachate solution by the EPA 6020
CocoAbsorb Exceeds TCLP Limits. **(PASSED)**

Test #2 is the CCR Metals SOP 7040 (Total Metals Concentration)
CocoAbsorb also Exceeded TTLC Limits **(PASSED)**

Test #3 required by California was the 96 hour CCR title 22 Fathead Minnow Hazardous Waste Screen Bioassay. The Sample used was one pound of CocoAbsorb saturated with one quart of 15W40 Used Oil. The results were 0 dead fish over a 96 hour period **(PASSED)**

Based on our Testing, petroleum base products absorbed in CocoAbsorb with the Testing done shows the products would be Non-hazardous.

The New product formed from encapsulating the petroleum product would be Non-Hazardous based solely on the test data done in California.

We fill that in passing these test we have proven that our product does not cause any detrimental damage to the land or waterways when disposed of in the landfill. And the testing shows that petroleum products will not release hydrocarbons when absorbed by the CocoAbsorb Product.

CocoAbsorb has done the testing needed for landfill safe for petroleum based products. Further testing will be done on other liquid but cannot be approved to dispose of in landfills until the testing is concluded. Product that are Radioactive or Industrial Chemicals and Solvents need to be dispose of in accordance with State and Federal Regulations.

Attached you will be given copies of all the testing done by CocoAbsorb for landfill safe.

Thank You,
Toby Wilson/ CocoAbsorb LLC
